

Power solution to your Imagination

Company Profile

XenoEnergy has more than 15 years experience and know how in R&D, Engineering and Production of Lithium Batteries. We are an independent company, using our experience and know how for the benefit and the success of our customers, free from any group decision.

Our objective is to help our customers to solve their energy- and battery problems, technically and economically, based on along term partnership co-operation. We know that the success of our customers will be also our success.

Characteristics of our Products

- **High Cell-Voltage**, a Nominal Open Circuit Voltage (OCV) of 3.65 Volt.
This is higher than the most existing battery-system.
- **High Energy Density**, up to 700 Wh/kg and 1380 Wh/l
- **Wide Temperature Range**, -55°C to +85°C, (max. +130°C, higher temperatures on request)
- **Low Self-discharge**, of 1% - 2% at RT permits a very long shelf life of more than 10 years.
- **Highest Reliability and Safety**, due to bobbin type construction and hermetically sealed case with glass-to-metal seal and laser welding.
- **Best Pulse-Behavior**, low voltage drop, even after temperature cycles or temperature storage.

Certificates and Approvals

- ISO 9001; TS16949; ISO14001; UL-Approval;
- Ex-Approval; IMDS-Approval (automotive industry), UN-Approval, ATEX, RoHS, WEEE
